· Percentage – 90.88%

Skills

· Programming Languages: Java, Python
· Web Technologies: HTML, CSS, JavaScript
· Version Control: Git, GitHub
· Database Management: MySQL
· Software Development Tools: Visual Studio Code, IntelliJ IDEA

Projects

RANDOM PASSWORD GENERATOR

· The main aim of the project is to generate a strong password which is necessary to protect from others. In this I used Html , CSS for frontend part and JavaScript for building a logic for generating a different password by using all the characters like Uppercase letters, Lowercase letters, Symbols and Special Characters. The password can be easily copied to clipboard and be used wherever we need.

Platform Used – Visual Studio Code
Languages Used - Html, CSS, JavaScript

<u>FIFA PLAYER MANAGEMENT SYSTEM</u>

· The main objective of this mini project is to help to store the data of the players of the team and creating the different queries statement and modification of the data and extraction of specific data from database. Can store the data for future reference and modification of the data to get the correct results.

Languages Used – Html, CSS, MySQL

Internships

ETHNOTECH ACADEMIC SOLUTIONS PVT LTD (26TH SEP 2022 – 19TH DEC 2022)

I successfully completed my internship in Ethnotech Academic Solutions Pvt.Ltd as Full Stack Java Developer. Learnt essential technologies required to develop a full stack application and used tools like Intellij Idea and Visual studio code. I am committed to continuous improvement and enthusiastic about the prospect of contributing my internship-acquired knowledge to a forward-thinking organization that values innovation and fosters a dynamic learning environment. My internship experiences have solidified my passion for Java Development, and I am excited to leverage these insights to drive value and make meaningful contributions as I embark on the next phase of my career.
